Science Lesson

Student writing – *Animal Research Worksheet*

Name

Date

Part A. Directions: Choose one animal from your biome to research.

What animal did you choose?

What biome did you study?

Where does your animal live?

What shelter does your animal use?

How does your animal get food and water?

Is your animal an herbivore, carnivore, or omnivore?

How did your animal adapt to survive?

What plants are found in your biome?

What other animals live in your biome?

How does your animal interact with the other animals in the biome? Give three examples.

Part B. Directions: Create an energy chain for your biome. Make sure arrows point in the direction from which the energy flows.

Part C. Directions: Draw the life cycle of your animal and label each part.
